

**JULY
20**

ORGANIZED BY
Sophia Institute for Studies of the
Global Environment
Association for Promotion of
International Cooperation (APIC)

SUPPORTED BY
Graduate School of Global
Environmental Studies

Island States are on the front lines of climate change. How to tap into each islands' biodiversity and cultural knowledge sets to reduce vulnerability and build resilience will be key to developing dynamic adaptive capacities in the face of increasing environmental challenges.

This symposium aims to be an open dialogue among diverse experts from Island States in Micronesia, Japan and the Caribbean as we collectively work together to realize island sustainability for all.

SOPHIA SYMPOSIUM

**CHARTING ISLAND SUSTAINABILITY
