

ISLAND SUSTAINABILITY LECTURE SERIES @ SOPHIA UNIVERSITY

GRADUATE SCHOOL OF GLOBAL ENVIRONMENTAL STUDIES
MARSHALL ISLANDS STUDY TOUR SPRING 2019

Tuesday, June 11, 2019 5:30–7:00 pm
Building 2, Room 409

**ISLAND SUSTAINABILITY ON THE FRONT LINE OF
CLIMATE CHANGE**

**Reflections of field-based learning to explore solutions
to the environmental challenges facing island nations**

Co-organized by the Island Sustainability Unit of the Institute for
Studies of the Global Environment and Graduate School of Global
Environmental Studies, Sophia University

Supported by the Association for the Promotion of International
Cooperation (APIC)

**In February 2019, 11 students from the Graduate School of Global
Environmental Studies travelled to the Republic of the Marshall
Islands to learn first hand from government officials, fishers,
farmers and members of local communities about life on the
frontiers of climate change; the challenges to be addressed and
the opportunities for sustainable development and biodiversity
conservation. Please join our students as they share with us what
they learnt from the field.**

**For those interested please contact genv-co@sophia.ac.jp
Session will be held in English only**
